COVER LETTER

My name is Brian Lee, and I am excited to be submitting my application materials for the Front End Developer position with your company. I have worked in web development and cloud host management for over 10 years, assisting large and small companies both. I would be thrilled to join your team.

I have been working as a React Developer for the past 8 years and have gained a lot of experience in the field. In addition to my React development skills, I am also an expert in HTML, CSS, Tailwind CSS, JavaScript, TypeScript, Node.js, MongoDB, MySQL, Firebase, AWS. I am good at web design and photoshop. I have a deep understanding of the latest web development trends and technologies. I am confident that I can quickly adapt to new technologies and trends and can be a valuable asset to your team.

My ability to manage my time effectively and work independently became assets to my work.

You are looking for an addition to the web team that can balance user experience with best practices. I have a particular interest in Front end development.

If hired, I strive to improve these user-end experiences and will show you my ability to solve the problems.

I want to thank you for the time you have spent reviewing my application. I am enthusiastic about this role because I see tremendous growth potential in your company and am eager to be a part of it. Please do not hesitate to reach out if you have any questions about my qualifications. I can start working immediately.

Best,

Brian Lee
